We are gladly & thankful to Principal, Dr. B. K Narendra and Head of the Department. Dr. P S Puttaswamy. Faculty member Dr. Manoj Kumar S B for the registration process to visit and share information about Tech-Summit-2022.

The One-day visit was organized with prior registration from Bengaluru tech summit-2022. The silver jubilee edition of the tech event was held with the theme '**TECH4NEXGEN**'. The summit was organized by department of electronics, information technology, Biotechnology, and science & technology under the Karnataka government in collaboration with the software technology parks of India. The students were benefited with the new technologies with **585 exhibitors on display, 2000+ startups 405 speakers with 72 sessions, 5000+ organizations by 32 countries** on various topics related to advanced technology. Parallely, Freshers profile, technique, takeup, SHG technologies.

This educational trip to the International Exhibition (BTS-2022) was innovative and informative. Faculty members coordinated the visit. The students enjoyed the trip immensely.

The purpose of Industrial Training is to provide exposure for students to practical engineering fields. Through this exposure, students will have a better understanding of engineering practice in general and a sense of frequent and possible problems. This visit is part of the learning process to fulfill the academic requirement as per ACU. To bridge the gap between class room teaching and industry requirement. To get corporate exposure and professional experience.

So, the exposure that uplifts the knowledge and experience of a student needs to be properly documented in the form of a report. Through this report, the experience gained can be delivered to their peers. A properly prepared report can facilitate the presentation of the practical experience in an orderly, precise and interesting manner.
